Description

The Master Plan for the Greek Orthodox Cathedral, located on a 12 acre site in Atlanta, expands the facilities on the campus of the existing Cathedral and Diocese. The first phase includes a recreation center, community center, an outdoor terrace, playground, parking, a duck pond, and walking trails. The recreation center will house a gymnasium, locker rooms, aerobics, arts and crafts, and a track. The community center includes a ballroom, commercial kitchen, library, and cafe. The second phase is planned to provide a personal care facility, a K-12 school, day care center, and future access road.
