

Erin Graves, LEED ^{AP} BD + C
Intern Architect

Education

Experience

Erin Graves has experience in all phases of design and contract administration for a wide variety of project types. She particularly enjoys problem solving for projects with difficult program and site constraints. Erin also has more than ten years of experience with various computer-aided modeling and drafting technologies, including BIM software. She likes to discover new ways of providing the client with new windows to a project through BIM applications.
