

Michael Snyder, AIA, LEED^{AP}, CEFPI
Project Manager

Education

Michael Snyder is a graduate of the University of Florida School of Architecture. He has been working with projects of various types and sizes since 1999. The majority of his recent work has involved the renovation of, and addition to, large-scale projects for various organizations and institutions. These projects have included recreation, education, workspace, infrastructure, and housing functions. These projects have involved a variety of specialized design considerations, such as the reuse and modification of existing structures, phasing of staged projects, coordination of construction activities with occupied spaces, and sustainable design and LEED certification.
